We're always looking for more ways to help small businesses and entrepreneurs share their good ideas. If you're taking your business online or transitioning to a career that requires greater digital skills, we want to ensure you're set up for success.

The digital Boost with Facebook program was launched to help small businesses across the country grow and provide more people the digital skills they need to compete and be found.

During this virtual event, you'll learn how to rise to the top of your customers' wish lists by learning how to strengthen and manage your online presence.

We'll also discuss ways to plan for the peak shopping season; how to stay organized; and how to use Facebook tools to reach customers.

See the complete schedule and register at: <https://boostwithfacebook.com/pasadena>
