# Our Mission

We work as a united team to help individuals facing end-of life illness live more fully, in comfort, with quality care and dignity. We care for all patients, caregivers and families enduring the challenges of a serious and progressive illness to ease the burdens. We carry out our mission by offering the right care at the right time in the right way.

# Our Vision

Our vision is to be the valuable community resource for addressing issues of serious illness, death and grief. We care about enabling our patients to live more fully. We work together with our patients and their families to help them discover life's most important moments. So we begin our relationship with our patients and their families by asking them what they want to do in order to tailor their care to support their goals and wishes. We pursue patient-centered approach.

# What is Hospice?

Hospice is not about how you die. It's about how you live. Hospice is a compassionate, patient-centered approach to medical care and support for patients and families facing end-of-life issues. We seek to maintain dignity, quality of life and provide physical comfort, as well as emotional and spiritual comfort for both the patient and their family.

# Who pays for Hospice Care?

The entire cost of hospice services is covered by most insurance plans, including Medicare, Medi-Cal, Veterans Administration and other commercial plans. The services include all members of the hospice care team, medication, and durable medical equipment required for the relief of pain, and the comfort of the patient. In most cases, there is no out-of-pocket expenses to the patient.
