ACCORDING TO THE NATIONWIDE INSURANCE SURVEY

For many without a plan for their business, **34%** say disaster recovery planning is a low priority, while time and cost at **11** and **15%**, play little roles in the decision not to have a written disaster recovery plan in place. Due to this **90%** of small businesses go out of business when they don't recover after **5** days of a disaster!" Will this be your story?

HOW PREPARED IS YOUR BUSINESS IN THE EVENT OF A DISASTER?

- Are your employees safe at work? How long could they go without pay?
- Do you have employees with special needs? How will they be evacuated?
- How many days do you have provisions for? Are you prepared to shelter in place?
- Do you understand your total financial implications?
- Are you part of a supply chain? What will happen to your customers or other vendors?
- How long can you withstand being closed?
- Are you prepared to relocate?
- Do you have the financial resources to establish a temporary office?
- Would you qualify for a disaster loan?
- What pre-disaster safety precautions have you taken? Could you pass an Osha Safety inspection?

If your answer is, "I don't know" or "I am not sure", call us and let us help you with an assessment.

Disaster in some form is imminent but preparation is a choice.
